

Chungmok Lee, Ph.D.

Dept. of Industrial & Management Engineering,
Hankuk University of Foreign Studies,
South Korea

Phone: (82)-10-5533-9625
Email: chungmok@hufs.ac.kr
Homepage: <http://chungmoklee.github.io>

Current Position

Assistant Professor, Dept. of Industrial & Management Engineering, Hankuk University of Foreign Studies, 3/2015 – present

Professional Experience

Research Staff Member, IBM Research – Ireland, Smart City Research Center, 6/2013 – 2/2015

Senior Researcher, Electronics and Telecommunications Research Institute (ETRI), 7/2011 – 6/2013

Invited Professor, Korea Advanced Institute of Science and Technology, 12/2010 – 6/2011

Visiting Scholar, Rutgers University, New Jersey, United States, Research optimization theory and applications, 2009–2010.

SW development team manager, Intellicube, Seoul, Korea, Developing logistics optimization package, 2002–2004.

SW development team manager, Koino, Daejeon, Korea, Developing internet based collaboration system, 2000–2002.

Education

Korea Advanced Institute of Science and Technology, Industrial Engineering(Optimization), Ph.D., 9/2004 – 8/2009

Thesis : Robust optimization models and algorithms for the problems in telecommunications and logistics.

Brief summary : Several optimization problems in the telecommunication network and logistics subject to data uncertainty are considered. To handle the uncertainty of data efficiently, the robust optimization methodology is adopted, where the goal is to obtain a solution which is feasible for all possible realizations of input data. Formulations of the problems and exact solution algorithms for the robust solution are proposed.

Korea University, Physics(Quantum Optics), M.S., 3/1997 – 8/1999

Thesis : Research on the optical pumping of the rubidium low velocity intense source.

Korea University, Physics, B.S., 3/1993 – 2/1997

Research Interests

Theory and Methodologies of Discrete Optimization :

Linear Programming, Integer Programming, Polyhedral Theory, Cutting Plane Theory, Graph Theory and Network Programming, Branch-and-cut and Branch-and-price approaches to NP-hard problems, Robust Optimization

Applications :

Telecommunication Network Design, Logistics Planning, Supply Chain Management, Scheduling, Data Mining, etc.

Research Papers

Table: Statistics of Research Areas

Research Area	Number of papers	Research Area	Number of papers
Telecommunication	4	Logistics	3
Data Mining	5	Theory	2
Health Care	1	Robust Optimization	6
Finance	0	Social Networks	1
Stochastic	1	Military	1

Published (or Accepted) Journal Papers

- [1] Jinil Han, Kyungsik Lee, **Chungmok Lee**, Ki-Seok Choi, and Sungsoo Park. Robust optimization approach for a chance-constrained binary knapsack problem. To appear in *Mathematical Programming*.
Robust Optimization Theory
- [2] Dohyun Kim, **Chungmok Lee**, Sangheum Hwang, and Myong K. Jeong. A robust support vector regression with a linear-log concave loss function. To appear in *Journal of Operational Research Society*.

Industrial Projects Experience

Long-term Strategic Planning of Korea Postal Infrastructure, 2011, Korea Post, Seoul, Korea : Building Long-term Strategic Planning of Domestic Transportation Network

Algorithm Framework for Robust Optimization Problems using Decomposition, 2009, National Research Foundation, Daejeon, Korea : Research of Robust Optimization Approach using Decomposition Methods

Optimization Algorithms for the Network Design Problem under Demand Uncertainty, 2008, National Research Foundation, Daejeon, Korea : Research of New Optimization Methodology for Network Design Problem with Demand Uncertainty

Train Car Allocation and Routing Optimization Engine Development, 2008, KORAIL, Daejeon, Korea : Design and Developing Train Car Operation Optimization Engine

Developing nanoRTS system, 2008, LG Display, Seoul, Korea : Design and Developing LCD Manufacturing Scheduling Engine

Process Equipment Allocation System Development, 2007, Samsung Electronics, Hwasung, Korea : Design and Developing Semiconductor Manufacturing Equipment Job Allocation Optimization Engine

GIS/GPS based Logistic Management System, 2007, IntelliCube, Seoul, Korea : Design and Developing Logistic Optimization Engine

K-POWER IDSS Optimization Engine Development, 2006, K-Power, Seoul, Korea : Design and Developing Power Plant Generation Planning Optimization Engine

Real Time Scheduler for Semiconductor Manufacturing, 2006, Hynix, Seoul, Korea : Design and Developing Semiconductor Manufacturing Scheduler

Honors and Awards

Young Management Scientist Award, Korean Operations Management Science Society, 2014

Research Division Award, IBM, 2014

Beak-Am Technology Award, Korean Institute of Industrial Engineers, 2011.

IT Skills

I am very fluent in using :

C, C++, C#, Python, .NET, Java, Matlab, R, Fortran, EJB, SQL, Cplex, XPress-MP, ~~ETX~~
